

SHATHA IBRAHIM ALKHULAIFAT

Riffa, Bahrain | +973 39049144 | shathakhlifat@gmail.com | LinkedIn: Shatha Ebarhem

PROFESSIONAL SUMMARY

Analytical and detail-oriented Cybersecurity graduate with hands-on experience in IT security auditing, compliance, and secure software engineering. Adept at conducting comprehensive systems assessments (ISACA, ISO 19011), identifying critical vulnerabilities, and engineering automated, secure integrations. Combines strong technical proficiency in modern frameworks (React, Rust, Node.js) with governance, risk, and compliance (GRC) principles to drive secure business operations. Highly adaptable professional continuously expanding technical expertise to deliver strategic, resilient, and compliant tech solutions.

EDUCATION

Bachelor of Science in Cybersecurity

University of Bahrain

2021 – June 2026

PROFESSIONAL EXPERIENCE

IT Security Audit Trainee

Alayam Newspaper

June 2026 – Present

- Conducted a comprehensive security audit of operating systems and IT infrastructure in alignment with ISACA and ISO 19011:2018 standards to minimize operational risks.
- Evaluated system access controls, data encryption policies, and patch management protocols, successfully identifying critical vulnerabilities.
- Acted as the lead auditor, authoring an executive report detailing discovered security gaps (e.g., absence of MFA and backup encryption) and providing strategic, actionable recommendations to decision-makers to enhance compliance.
- Demonstrated high accountability by establishing target resolution dates and translating complex technical risks into clear business impacts.

KEY TECHNICAL PROJECTS

CHEA – Cyber Defender Toolkit

Senior Graduation Project

- Developed a comprehensive cybersecurity desktop application featuring a secure password vault, link/file scanning capabilities, and advanced security analysis tools.
- Architected the frontend utilizing React 18, TypeScript, and Zustand for state management, seamlessly integrated with a Firebase Firestore cloud database.
- Leveraged Tauri with a Rust backend to achieve high native desktop performance and enforce strict architectural security boundaries.
- Designed an immersive, cyberpunk-themed user interface supporting light/dark modes and modern animations using Framer Motion.

Secure 2-Way CRM Integration Bridge

- Engineered a highly secure, automated 2-way synchronization bridge connecting an external CRM inbox with HubSpot using Node.js, TypeScript, and PostgreSQL.
- Implemented complete OAuth 2.0 authentication protocols and managed real-time data updates utilizing RESTful APIs and Webhooks.
- Built an automated lead-scoring logic layer with stringent data validation policies to process and dynamically route incoming data packets.
- Wrote highly resilient, defensive code to effectively handle edge cases and null data, ensuring system stability and crash prevention.

SKILLS & COMPETENCIES

Cybersecurity & IT Audit: Risk Assessment, Compliance Standards (ISACA, ISO 19011), Access Control Evaluation, Vulnerability Management, MFA Implementation, Technical Documentation & Reporting

Software Development: Node.js, TypeScript, Rust, React 18, PostgreSQL, REST APIs, Webhooks, OAuth 2.0, Firebase, Tauri

Soft Skills: Analytical & Problem-Solving, Extreme Attention to Detail, Effective Communication, Adaptability & Continuous Learning, Leadership & Accountability

CERTIFICATIONS & LANGUAGES

Certifications

CompTIA Security+ (In Preparation)

Languages

Arabic (Native) | English (Professional Working Proficiency – IELTS: 6.5)
